

Dear friends,

You only come across a few stories in our lifetime that you just cannot stop thinking about! The Butterfly Effect is one of those stories. In a word, it's AMAZING!

Andy Andrews, in our opinion, is one of the most talented writers in the country. His books have sold millions of copies. In fact, he's had four different books on the New York Times best-sellers list. But as a speaker...he's one of the best.

When he speaks, he usually closes with his favorite story (he says it's the one that every client remembers)...The Butterfly Effect. Therefore, to say we're honored to present this book and share this wonderful, true story with the rest of the world is an understatement!

So sit back, turn up your speakers, and be inspired by our three minute movie about how *your* life makes a difference.

So just click here to watch our movie. And don't forget to pay it forward by sharing with friends, family and co-workers. They'll thank you for it!
